Unity Download: <https://unity3d.com/get-unity/download>

1) Download Unity Hub from <https://unity3d.com/get-unity/download>

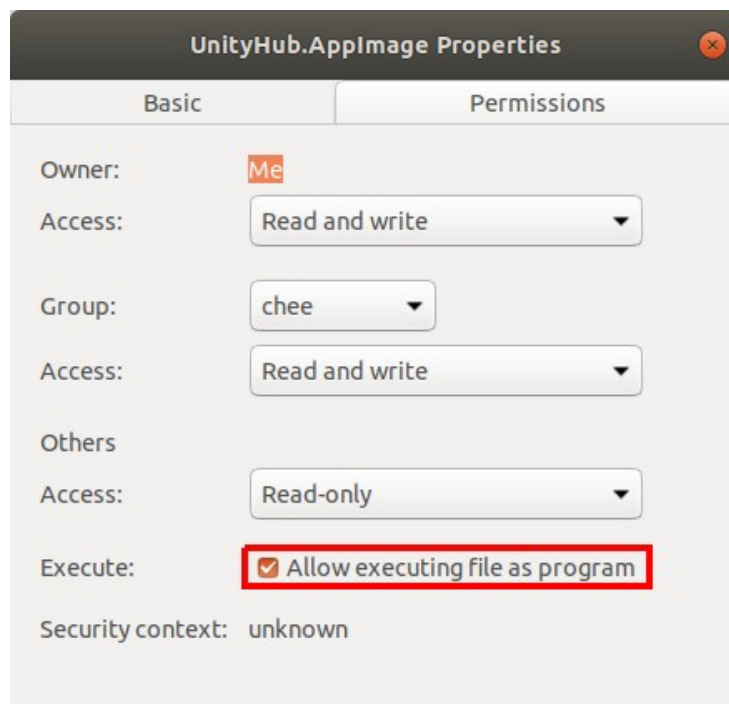

1.1) Either select **Download Unity Hub** or **Choose your Unity + download**

1.2) If **Choose your Unity + download** was selected, go to **Individual** tab and select **Student** or **Personal**

Note: This readme is for **Personal** installation of Unity and might differ for Student version

2) Right-click on **UnityHub.AppImage** and select **Properties**

3) On **Permissions** tab, check the **Execute** box to **Allow executing files as program** and close the window

4) Double-click on **UnityHub.AppImage** to open Unity Hub

5) If this is the first time opening Unity Hub, a license warning will appear so click on **Manage License**

You have no valid license

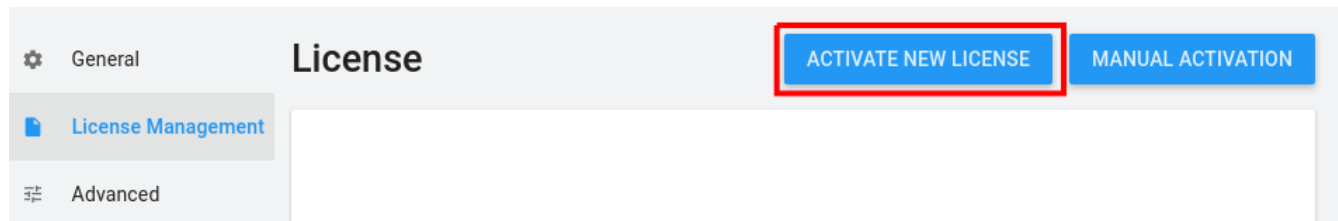

MANAGE LICENSE

DISMISS

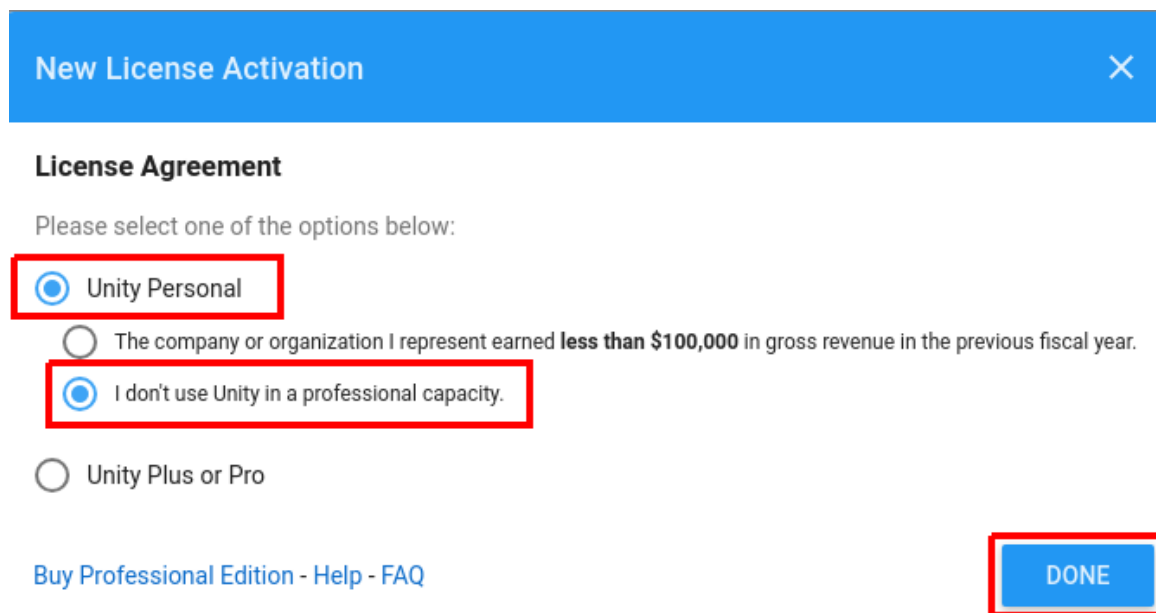

6) Then, click on login to login or sign up to your account

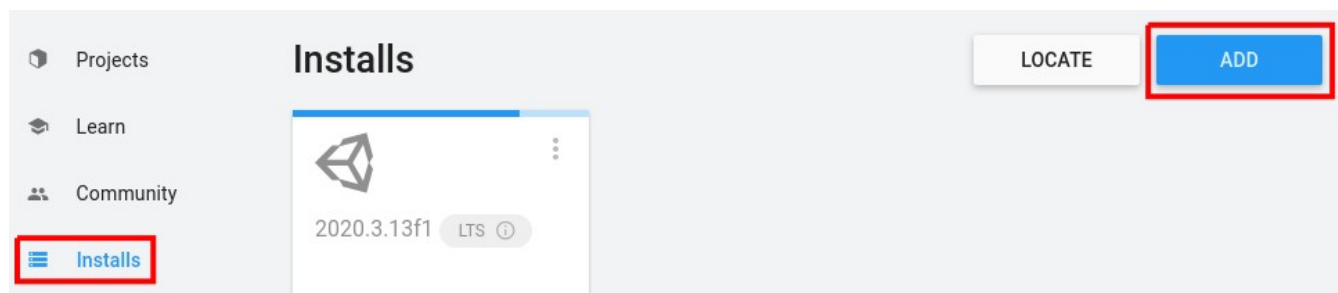

7) Click on ACTIVATE NEW LICENSE

8) Select **Unity Personal** and choose 2nd option, then **DONE**

9) Go to **Installs** and click on **ADD** to install an Unity Editor

10) Install the recommended Unity Editor

(END)
